How to Unlock TiviMate Premium: The Complete User Guide 2026

In the rapidly evolving world of digital streaming, 2026 has solidified one thing: convenience and interface quality are just as important as the content itself. If you are using an Android-based streaming device, whether it's a Firestick, Nvidia Shield, or a Google TV box, you've likely heard of TiviMate.

Widely regarded as the most sophisticated IPTV player on the market, TiviMate offers a professional, cable-like experience. However, the free version only gives you a glimpse of its potential. To truly transform your home cinema, you need to unlock the Premium features.

In this comprehensive guide, we will walk you through everything you need to know about unlocking TiviMate Premium in 2026 and why pairing it with a high-quality service from Bentvpro.com is the ultimate entertainment upgrade.

Why You Need TiviMate Premium in 2026

While the free version of TiviMate allows you to watch a basic stream, it lacks the bells and whistles that make modern streaming enjoyable. Here is why upgrading to Premium is a non-negotiable for serious viewers:

1. **Multiple Playlist Support:** The free version limits you to one playlist. Premium allows you to integrate multiple sources, making it easy to switch between different content providers.
2. **Advanced EPG (Electronic Program Guide):** With Premium, you get a fully functional TV guide that shows what's playing now and what's coming up next.
3. **Catch-up Feature:** Missed your favorite show? TiviMate Premium supports catch-up services, allowing you to scroll back in the EPG and play previously aired content.
4. **Multiscreen Mode:** Watch up to four channels at once—perfect for sports fans who want to keep an eye on every game simultaneously.
5. **Customizable Interface:** Change the look and feel, adjust the transparency of the menus, and organize your favorite channels into custom groups.
6. **Scheduled Recordings:** Never miss a moment by scheduling recordings directly to your device's storage or a network-attached storage (NAS) system.

To get the most out of these features, you need a stable, high-bitrate stream. We highly recommend visiting Bentvpro.com to secure a subscription that matches the premium quality of the TiviMate interface.

Prerequisites Before Unlocking Premium

Before you begin the activation process, ensure you have the following:

An Android-based Device: TiviMate is designed for Android TV, Fire TV, and Android boxes.

The TiviMate App Installed: You can find this on the Google Play Store or sideload it onto your Firestick.

An Active Internet Connection: High-speed internet is required for both activation and 4K streaming.

A Subscription from Bentvpro.com: To test your TiviMate Premium features, you'll need a reliable playlist. Bentvpro.com provides the M3U or Xstream Codes credentials you'll need to populate the app.

Step-by-Step Guide: How to Unlock TiviMate Premium

Unlocking TiviMate Premium involves two main components: the TiviMate Companion app (for payment and account management) and the TiviMate Player app (where you watch).

Step 1: Install the TiviMate Companion App

If you are using a device that doesn't have the Google Play Store (like an Amazon Firestick), you cannot pay for the subscription directly through the TV app. You must use an Android phone or a tablet to download the TiviMate Companion app.

1. Open the Google Play Store on your Android smartphone.
2. Search for "TiviMate Companion" and install it.
3. If you don't have an Android mobile device, you can use an Android emulator like "BlueStacks" on your PC or Mac to run the Companion app.

Step 2: Create Your TiviMate Account

1. Open the TiviMate Companion app.
2. Click on "Account" and create a new account using a valid email address and a strong password.
3. Once logged in, you will see the subscription options.

Step 3: Choose Your Subscription Plan

In 2026, TiviMate generally offers two types of plans:

Annual Subscription: A yearly recurring fee that covers up to 5 devices.

Lifetime Purchase: A one-time payment for permanent access on up to 5 devices.

We recommend the Lifetime Purchase for the best value. Once the payment is processed through Google Play, your account is officially "Premium."

Step 4: Activate Premium on Your Streaming Device

Now that you have purchased the subscription, it's time to link it to your TV.

1. Open the TiviMate app on your Firestick or Android TV.
2. Navigate to Settings (the gear icon on the left sidebar).
3. Select "Unlock Premium."
4. Choose "Login" and enter the email and password you used in the TiviMate Companion app.
5. Give your device a name (e.g., "Living Room Firestick") and click "Activate."

Congratulations! You now have full access to all TiviMate Premium features.

Setting Up Your Content with Bentvpro.com

Now that your player is unlocked, you need to add high-quality content. TiviMate is just an empty shell; it needs a "fuel source" to work. This is where Bentvpro.com comes in.

1. On TiviMate, go to Settings > Playlists > Add Playlist.
2. Choose Xstream Codes parameters (this is usually the most stable method).
3. Enter the Server URL, Username, and Password provided by Bentvpro.com.
4. Click Next, and TiviMate will begin downloading the channels and EPG data.

By using Bentvpro.com, you ensure that your premium player is backed by premium servers, minimizing buffering and maximizing image quality.

Maximizing the TiviMate 2026 Experience

Once you are unlocked and connected to Bentvpro.com, take a few minutes to optimize your settings:

1. Enable Auto-Update EPG

Go to Settings > EPG and turn on "Update on app start" and "Update on playlist change." This ensures your TV guide is always accurate.

2. Configure Buffer Size

If you have a very high-speed connection from Bentvpro.com, you can set your buffer size to "None" or "Small" for instant channel switching. If your Wi-Fi is unstable, set it to "Large" to prevent stuttering.

3. Setup Multiscreen

While watching a channel, long-press the "Select" button on your remote and choose "Multi-view." You can now add more channels from your Bentvpro.com list to watch multiple events at once.

Troubleshooting Common Issues

"Could not log in": Ensure you are using the exact email and password created in the Companion app. Check for typos.

"No EPG data": Make sure the EPG URL from Bentvpro.com is correctly entered in the playlist settings.

Device Limit Reached: TiviMate Premium allows 5 devices. If you've reached the limit, use the Companion app to log out of an old device.

Conclusion

Unlocking TiviMate Premium is the single best investment you can make for your home entertainment setup in 2026. From its sleek interface to its advanced recording and multiscreen capabilities, it offers a viewing experience that rivals traditional cable and satellite providers.

However, a premium player is only as good as the service behind it. To avoid the frustration of lag, broken links, and poor resolution, you need a provider that understands high-performance streaming.

Are you ready to experience TV the way it was meant to be?

Visit [Bentvpro.com](<https://bentvpro.com>) today to get your premium subscription and start enjoying the full power of TiviMate Premium. With Bentvpro.com, you get 24/7 reliability, 4K support, and a massive library of content that integrates perfectly with TiviMate.

Don't settle for average streaming. Upgrade to TiviMate Premium and Bentvpro.com now!
